HUGE HYBRID BLUEBERRIES

These big, luscious, marble size U. S. Dept. of Agri. hybrids are so good for eating fresh or delicious in pies, preserves and canned or frozen. The attractive shrub-like plants bear large clusters of mild, sweet fruit, easy to pick. They require no spraying and it is easy to grow blueberries if you make the soil acid and mulch heavy with peat, sawdust, oak leaves or any organic matter. A heavy mulch is better than cultivation. If soil is sweet or alkaline mix thoroughly with aluminum sulphate. We send sufficient aluminum sulphate with each

order for planting 1st year. Plant no less than two varieties for pollination. The plants grow for a lifetime and have handsome glossy foliage that changes red, gold and orange in fall. Beautiful pink-tinged white fragrant blooms on compact bushy plants make blueberries ideal for hedges or landscaping your yard. Hardy throughout U. S. A. You will get more and larger fruit if the old canes are pruned so the plants keep new shoots coming. On good blueberry land a gross sales of \$1,200 per acre selling wholesale is the average income.

WEYMOUTH—18F1—Improved early ripening hybrid.

STANLEY—18F2—Excellent mid-season ripening hybrid.

PEMBERTON—18F3—Recommended, late ripening hybrid.

Prices of Blueberry varieties listed and numbered above. State name, quantity, catalog number, size and price. Plant 2 or more a few feet apart for pollination to insure good fruiting.

Inexpensive farm fence for turning livestock. Thick, fast growing plants require little care.

Excellent hedge for boundary lines. Can be trimmed to any height. Enjoy privacy for outdoor living.

ROSA MULTIFLORA The Miracle Living Fence

23H11—Protect and beautify your property. A cheap practical fence that grows so dense no person or animal can get through.

The plants grow 6 to 8 ft. tall and 5 to 7 ft. wide, are tough and fast growing. Covered with a multitude of white flowers in spring; loaded with attractive red fruit in fall and winter which provides food for wild life.

Recommended by U. S. Soil Conservation service for livestock farm fence and for factories, parks, estates, institutions, large lawns, etc., that wish to keep animals and trespassers off their property. Present recommendation by U.S.D.A. are to plant 1 ft. apart in a single row for stock tight fence. Ornamental hedges can be planted 18 inches apart and kept

trimmed to desired height. Trial fences planted throughout east, west and south have proven successful. North of Milwaukee there is danger of winter injury. The general use of rosa multiflora is just beginning but its value is proven for cheap fence, game management, property protection, windbreaks and erosion control to soil and crops, will last for generations.

PATENTED ROSES

Patented roses are new varieties, with outstanding merit, that have been granted patent rights. This gives the originator protection and encourages him to continue his research. The six patented roses listed below are all fully double blooming, hybrid tea roses that will bloom profusely and continuously in your garden from late May to late fall.

CHARLOTTE ARMSTRONG (Patent 455)
29R1—(AAR's Award) Magnificent cerise-red. Considered one of the finest roses in existence. \$2.00 each; 3 for \$5.25.

LOWELL THOMAS (Patent 595)

PEACE (Patent 591) (AAR's Award)
29R7—World renowned for its massive size, exquisite gold and pink color, profusion and sturdiness. \$2.50 each; 3 for \$6.60.

BLANCHE MALLERIN (Patent 594)
29R8—Pure glistening frosty white in bud and bloom. Vigorous, free blooming, superb. \$2.00 each; 3 for \$5.25.

FALL ROSE PLANTING INSTRUCTIONS

Plant roses this fall for earlier and more abundant blooms. All roses offered are large, 2 yr. Northern Ohio field grown plants. All are everblooming and will flower continuously for you from next May until early winter. Follow simple directions for healthy plants and abundance of blooms. Plant below the bud or where branches start. This is usually 2 inches deeper than soil marks where they have grown in the nursery.

After planting cut off top of rose plants 10 to 15 inches above soil. Then, mound earth 10 to 18 inches high (as shown in picture). Cover with leaves, straw or coarse material to keep winter rains from washing soil. Remove or level off mound of earth next spring when new growth starts. Roses cared for in above manner give greatest satisfaction and from our experience you can produce more prize winning blooms. Plant roses in beds 2 ft. apart in alternate rows.

EVERGREEN DIGGING NOTICE

All evergreens for shipping fresh dug bare-root from our fields, wrapped in moist peat for more satisfactory and economical delivery. Large sizes balled in earth at same prices when you drive to nursery for cash and carry.

INSTRUCTIONS TO PLANT

Never permit roots to shrivel or dry out—PLANT IMMEDIATELY. Dig large hole, cover roots with rich topsoil, firm and soak well to settle soil around roots. Leave burlap on B&B evergreens; wet burlap soon rots.
